

TechBridge Ltd

Job Title: Software Engineer (Backend)

Location: London, UK / Remote | Salary: £65,000 – £85,000 p.a.

About Us / Company Overview

TechBridge is a fast-growing fintech startup building next-gen payment infrastructure. We serve 500+ enterprise clients across Europe. Founded 2018, Series B funded.

Key Responsibilities

- Design & develop scalable RESTful APIs using Python (FastAPI/Django)
- Collaborate with front-end team and product managers on feature delivery
- Write clean, testable code with >80% unit test coverage
- Participate in on-call rotation (1 week/month)
- Review pull requests and mentor junior engineers
- Optimise database queries (PostgreSQL, Redis)

Requirements / Must Have

1. 3+ years professional Python experience
2. Proficiency in SQL and relational databases
3. Experience with Docker & Kubernetes
4. Familiarity with CI/CD pipelines (GitHub Actions, Jenkins)
5. Strong understanding of REST API design principles
6. BSc in Computer Science or equivalent

Nice to Have (Preferred)

- Experience with AWS (EC2, RDS, Lambda)
- Knowledge of message queues (Kafka, RabbitMQ)
- Open-source contributions
- Fintech/payments domain experience
