

Analytix Corp

Job Title: Data Scientist – NLP & ML

Location: New York, NY (Hybrid) | Salary: \$120,000 – \$155,000 + equity

About Us / Company Overview

Analytix Corp builds AI-powered analytics for retail and e-commerce. Our platform processes 10B+ events/day. We are looking for a talented data scientist to join our growing AI team in NYC.

Key Responsibilities

- Build and deploy machine learning models (classification, regression, NLP)
- Work closely with product team to define ML use cases
- Own model evaluation, monitoring, and retraining pipelines
- Analyse large datasets using SQL, Spark, and Python
- Present findings to non-technical stakeholders
- Write model documentation and maintain ML registry (MLflow)

Requirements / Must Have

1. M.Sc or PhD in Data Science, Statistics, Computer Science, or related field
2. 3+ years industry experience in ML/DS role
3. Strong Python skills (pandas, scikit-learn, TensorFlow or PyTorch)
4. Experience with NLP techniques (transformers, BERT, etc.)
5. Proficiency in SQL
6. Ability to communicate complex results clearly

Nice to Have (Preferred)

- Experience with Spark / Databricks
- Published research or Kaggle competition experience
- Knowledge of recommendation systems
- Cloud platform experience (GCP preferred)
